Laudatio

Best Postproduction

„Terra X – Sieben Kontinente – ein Planet: Nordamerika“

A film by: Chadden Hunter

Edited by: Toni Kubiczek

German Version: Frederike Haedecke and Uta von Borries

A BBC and Terra X Production

Impressively edited images of our planet's elemental forces supported by an excellent score draw the audience into the film. The script is based on short, lovingly told stories from the world of North America's climate zones. You become friends with the small fire flies and succumb to the fascination of mullets and polar bears and their hunting methods. Terra X: Seven Continents – North America is a worthy winner of the Best Postproduction Award.
