14. - 18. SEPTEMBER 2016

Laudatio **Best Ecology- and Science Film**

"Acid Ocean"

Scriptwriter and Director: Sally Ingleton

Cinematography: Simon Enderby, Peter Zakharov

Broadcaster/Production: NOVA WGBH Boston, ARTE, SVT, ZDF, SBS, Scubazoo, Finas

Production: 360 Degree Films

It is quite a challenge to convey scientifically complex issues in a graphically lively and succinct way. This film succeeds in doing just that. In exotic habitats and by creatively experimenting passionate and congenial scientists document one of the major problems on earth: the rising acidity of our oceans.

The film team's skilful direction sets an unusually lively stage for the protagonists and their subject creating a lasting effect on the audience.
