“Legacy Warnings!”

A Film by: Katja Becker, Jonathan Happ und Jean Jacques Schwenzfeier

Production: moving media e.V.

Highly motivated environmental campaigners use the medium film to raise more public awareness. Their brilliant investigations consistently stir up hornets' nests. The filmmakers feature all parties involved in a subject matter without rating them. Thus they manage revealing interviews with representatives of the nuclear power lobby. Taking them on requires lots of courage.

This thrilling report lets you forget that this is a newcomer film.
